What is MPPT solar inverter?

Nowadays, almost all solar inverters are embedded with MPPT technology. An MPPT solar inverter performs two roles: The maximum power point tracker in the inverter converts high DC power into low DC power. The low DC power is converted into AC power that's used to run your household appliances.

Which Inverter should I buy if I don't use MPPT?

You have to use an inverter that doesn't use the MPPT algo at all. String inverters use Maximum power point tracking algorithms. So, you'll have to buy a different inverter. One option is to buy MLP inverters by SolarEdge. The second option is to buy M-phase micro inverters.
