

China 500 watt solar inverter in Turkey

Overview

What is a microinverter solar system?

Typically, microinverters are “distributed” inverters. Solar PV systems with microinverters have a small inverter installed for each individual solar panel. Instead of sending energy from every panel to a single inverter, microinverters convert the DC energy to AC energy on the roof itself.

How has privatization impacted the solar power industry in Turkey?

The government also believes that the privatization of the power distribution in the country has contributed to boosting the level of competition and subsequently growing the solar capacity in the country. There is a good mix of local and foreign suppliers and distributors of solar power equipment in Turkey.
