China-Europe Industrial solar container battery

Overview

Will China Export ncm523 batteries to Europe in 2025?

Projections for 2025 indicate that China will export NCM523, NCM622, NCM811, and LFP batteries with BEVs to the European Union, with export volumes of 5.3 GWh, 1.5 GWh, 8.5 GWh, and 8.2 GWh, respectively.

Can BEV batteries be recycled in China?

Furthermore, batteries from exported BEVs, once discarded abroad, are not returned to China for recycling. As a result, in 2023, China recycled only 0.5 kt of lithium, 1.5 kt of cobalt, and 2.9 kt of nickel, which accounted for just 1.6 %, 5.0 %, and 4.1 % of the lithium, cobalt, and nickel required for new LIB production that year.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

How many battery recycling companies are there in China?

Despite having over 110,000 registered battery recycling enterprises, only about 100 are qualified for the comprehensive utilization of power LIBs, meaning that <25 % of spent LIBs are processed by regulated companies (Cao and Liu, 2024). Furthermore, batteries from exported BEVs, once discarded abroad, are not returned to China for recycling.
