# Community-use European-style folding container off-grid type

## Overview

---

### What is an off-grid Solar System?

(coming soon) The Off-Grid version consists of a solarfold Container in combination with a suitable auxiliary power storage container – not hooked up to the power grid and working completely autarkically. The system provides up to 80kW of discharge power and supplies plugged-in consumers with power – even when the sun doesn't.

### What is a solarfold on-grid container?

The solarfold on-grid container can also be expanded with various storage solutions. Each package contains a different number of Solarfold containers and the appropriate battery capacity. These combinations are not only used to optimize personal consumption, but can also be particularly valuable for energy trading on the control energy market.

### What are the possible on-grid versions?

The following are possible On-Grid versions: (coming soon) The Off-Grid version consists of a solarfold Container in combination with a suitable auxiliary power storage container – not hooked up to the power grid and working completely autarkically.

### What is a foldable solar container?

Foldable solar containers merge two mature technologies: lightweight foldable solar panels and ISO shipping containers. The systems, CDS Solar states, are standard containers with inverters, controllers, batteries, and hinged panel arrays built into them, which open while in use and fold up into a compact form to ship.
