

## **Community uses Abuja solar container 350kW**

## Overview

---

Can solar power power Mbiabet esieyere & udouba?

The small installation of solar panels, batteries and transmission lines proposed by the company Prado Power would service 180 households in Mbiabet Esieyere and Mbiabet Udouba, giving them significantly more reliable electricity for a fraction of the cost of diesel generators.

Why is Nigeria putting its bets on solar mini-grids?

That's why Nigeria is placing its bets on solar mini-grids — small installations that produce up to 10 megawatts of electricity, enough to power over 1,700 American homes — that can be set up anywhere.

Will Africa get a solar mini-grid in 2022?

In 2022, a solar mini-grid was installed in the remote Nigerian village of Mbiabet Esieyere, bringing the community affordable, reliable power. For climate and livelihoods, Africa bets big on solar mini-grids.

Did residents agree to a solar panel installation in 2022?

Village leaders agreed to the installation, though many residents remained skeptical. But when the panels were set up in 2022, lights blinked on in the brightly painted two-room homes and tan mud huts dotted sparsely through the community.
