

Connect the combiner box to the PV inverter

Overview

What is a PV combiner box?

It is responsible for combining and protecting the multiple strings of solar panels or photovoltaic modules that make up the solar array, before connecting them to the inverter. The PV combiner box acts as a junction box, bringing together the positive and negative wires from each string of solar panels.

How do you install a photovoltaic combiner box?

Cable entry device or conduit entry port: These openings allow cables from the strings of solar panels and output cables to enter the combiner box while maintaining waterproof sealing. Peel off the outer sheath of the cable. Wear during installation. How are the components of the photovoltaic combiner box installed?
