

Cordoba-style solar price structure in Argentina

Overview

How much solar energy does Argentina produce in 2021?

With solar energy generation in Argentina increasing by more than 100-fold in just five years, the country generated approximately 2.19 TWh of solar energy in 2021, up from 16.4 GWh in 2017, representing a 63% increase in solar energy production in Argentina.

When did solar thermal energy become a key energy source in Argentina?

Solar thermal energy in Argentina was already considered a potential key energy source in 1975 , when a national R&D program for the development of solar energy and other renewables was launched, leading to numerous research programs (see next section) and the elaboration of norms and certification criteria for ST collectors .

Does Argentina have a potential for solar energy utilization?

Conclusions Our work found a large gap between Argentina's potential for solar energy utilization and the current solar energy deployment, despite advantages such as a high solar and land resources.

Why is solar thermal technology less developed in Argentine?

Solar thermal technology is even less developed, in part due to the low natural gas prices resulting from political strategies that aim to soften the impact of an unstable economy on family budgets. This review describes this gap by summarizing the current state of Argentine solar energy.
