

# **Cost breakdown for solar container leasing options**

## Overview

---

How much does a solar lease cost?

Solar lease payments usually range from \$75 to \$200 per month, depending on the number of solar panels installed and local electricity costs. Most solar lease agreements have terms of 25 years, with an option to either renew the contract, purchase the system, or remove the solar panels at the end of the term. How does a solar lease work?

.

What is a solar lease?

A solar lease is a contract between a homeowner and a solar company that allows the user to have solar panels installed on their property with low upfront costs – or none at all. In return, the homeowner pays a fixed monthly lease payment, which is calculated using the estimated production of the system.

Are solar leases a good idea?

Solar leases are a great way for everyone to benefit from solar energy – especially those who can't afford the upfront costs. Most lease suppliers provide the option of a no-cost upfront payment, whilst others offer the option to pay for just part of the system.

Should you lease or buy solar panels?

Solar power is among the most affordable renewable energy options, whether for businesses or homes. Companies that provide solar products are everywhere these days, but to take advantage of the benefits of solar energy, homeowners are faced with a major decision: solar leasing vs. buying panels outright.
