

Cost of a 100kW Solar Containerized Container for Australian Farms

Overview

How much does a 100kW Solar System cost in Australia?

The cost of installing a 100kW solar system in Australia varies depending on system design, panel quality, and additional components like batteries or monitoring systems. On average, the installation costs range between \$90,000 and \$140,000.

How much does a 100kW Solar System cost?

As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate. The graph below – from our Commercial Solar PV Price Index – shows average price trends for 100kW solar systems since Solar Choice started keeping track in May 2014.

How much does a commercial solar system cost?

On average, the 100kW commercial solar system will cost around \$86,845, including government rebates and taxes. The actual cost will depend on the installer you choose and your location in the country. Besides its energy generation potential, this system is widely popular because it's the cut-off size for the Australian government rebates.

How does a 100 kW Solar System benefit a business?

A 100kW solar system helps businesses offset their energy consumption, cutting electricity bills by as much as \$25,000 annually. Electricity costs are one of Australia's largest business operational expenses, second only to rent and wages.
