Czech Solar Power System

Overview

How many solar power plants are there in the Czech Republic?

At the end of 2021, there were over 50,000 photovoltaic power plants with an installed capacity of about 2200 MWp in the Czech Republic. There were 500 solar parks with a capacity of over 1 MWp. During 2022, the number of installations rose to almost 85,000 PV plants with a total capacity of 2,460 MWp.

How many solar parks are there in the Czech Republic?

There were 500 solar parks with a capacity of over 1 MWp. During 2022, the number of installations rose to almost 85,000 PV plants with a total capacity of 2,460 MWp. The development of wind energy in the Czech Republic also continues apace.

Why is solar energy so unpopular in the Czech Republic?

Solar energy has long been unpopular among Czech politicians since high compensation led to an uncontrolled boom in solar in 2009-2010, costing around 1.8 billion of euros in subsidies per year to the sector split between consumers and the government. The bill also raises special taxes paid by solar plants built in 2009-2010.

Will the Czech Republic invest in solar power?

The Czech Republic will have hard time looking for someone willing to invest in the sector," the Czech Solar Association Chairman Jan Krcmar said. Majority state-owned electricity producer CEZ (CEZP.PR) plans to invest \$4.15 billion - four times its 2020 profit - into building 6 gigawatt of solar power capacity by 2030.
