# Czech communication green base station line construction

## Overview

---

How long is a line in the Czech Republic?

The Czech Republic had 5,874Ckm of line length in 2023 and this is expected to rise to 6,006Ckm by 2028. Listed below are the five largest transmission projects by line length in the Czech Republic, according to GlobalData's power database.

Why should Czech Republic invest in railways?

The financing is expected to accelerate an increased use of rail transport, with clear environmental benefits over traditional road transport. "The development of high-quality railways is key for the Czech Republic on a domestic and Central European scale.

Does the European Investment Bank Fund Czech projects?

The European Investment Bank finances sound investment contributing towards EU policy goals. In 2022 alone, the EIB made available over €1.7 billion for Czech projects.

What is Hradec – Chrast line?

The Hradec – Chrast Line is a 400kV overhead line with a length of 82.4Ckm running from Hradec to Chrast. The project is proposed and is expected to be commissioned in 2029. The Hradec – Chrast Line is an overhead line that will be operated by CEPS. The line will carry alternating current (AC) through double circuit cable.
