

WALMER ENERGY

Danish Energy Storage Container Single-Phase Distributor

Overview

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

How can Danish corporations contribute to a sustainable world?

Danish corporations shall gain a position of strength, that builds on a close interaction between research and corporations – with an ambition of contributing to a sustainable planet as well as ensuring jobs, export and earnings in Denmark.

What is thermal energy storage?

Thermal energy storage comes from storing energy from renewable energies in the form of heat, which in then can be used in district heating systems or be re-converted to electricity through a turbine. The heat can be stored in rocks, water, molten salts, or other phase-changing materials.
