

WALMER ENERGY

Danish energy storage project export

Overview

What services does Danish energy export provide?

At the same time, we provide exhibitor consultancy and other, related services, allowing you to focus exclusively on what you do best: opening doors and closing deals. Danish Energy Export was established in 2024 as an extended part of the cooperation between Green Power Denmark (former Wind Denmark) and the Danish Export Association.

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

How will a Bess project help Denmark's energy grid?

Denmark's energy grid, which has been a frontrunner in incorporating wind power, remains exposed to periods of imbalance and price fluctuation, and BESS installations will offer useful management and optimization. The Everspring portfolio, financed by Ringkjøbing Landbobank, is intended to provide flexible capacity to the Danish grid.

Danish energy storage project export
