

# **Does the new energy battery cabinet have a balancing board**

## Overview

---

What is the Energy Cabinet?

Smart Management and Convenience Intelligent Monitoring System:  
Integrated with a smart monitoring system, the Energy Cabinet provides real-time battery status, system performance, and safety monitoring, enabling remote supervision and fault diagnosis for streamlined operations.

What is balancing board & Protection Board?

The balancing board is mainly used to maintain the voltage balance between battery cells and prevent overcharge or over-discharge problems caused by voltage imbalance between battery cells. The protection board is to protect the safety of the battery and prevent short circuit, overcharge, over-discharge and other problems.

What is balancing plate & protective plate in lithium iron phosphate batteries?

The functions and functions of the balancing plate and protective plate in lithium iron phosphate batteries are different. The balancing board is mainly used to maintain the voltage balance between battery cells and prevent overcharge or over-discharge problems caused by voltage imbalance between battery cells.

Why should you choose Huijue energy storage cabinet?

As a leading innovator in advanced energy systems, Huijue ensures that this cutting-edge system seamlessly supplies sustainable energy for critical operations, transforming the way industries manage their energy needs. Why choose Our energy storage cabinet?
