

# **EU Communications Emergency Base Station**

## Overview

---

What is euccs project?

EUCCS Project has been recognised by the European Commission in the new EU Security Strategy. EUCCS is the acronym used for the European Critical Communication System, which aims to facilitate the equivalent of cross border broadband roaming for European emergency services.

What are emergency communications?

Emergency communications Emergency communications are defined primarily as a means of communication through interpersonal communications services between an end-user and the PSAP with the goal to request and receive emergency relief from emergency services.

What is the euccs initiative?

The EUCCS initiative was conceived following the Council Conclusions on the Protection of Public Spaces on June 7, 2021. These conclusions called for a robust, EU-wide communication system to ensure the security and interoperability of public safety communications.

Are electronic communications networks a future proof solution for emergency communications?

The lack of commonly agreed standards in support of electronic communications networks for emergency communications in Europe is a barrier to implementing future proof solutions which meet the requirements of the European Accessibility Act (EAA - Directive (EU) 2019/882) and the requirements of Article 109 of the EEC.
