

# **EU standard solar module panels**

## Overview

---

Are solar panels imported or manufactured in the European Union?

Solar panels imported or manufactured in the European Union are subject to various regulations, directives and standards. Ensuring compliance requires that the solar panels meet certain technical requirements. In addition, solar panels must be correctly labelled, documented, and tested.

What is the EU solar standard?

Image: Markus Spiske, Unsplash Members of European Parliament (MEPs) have adopted the EU Solar Standard, which will require the installation of solar on buildings across EU member states. The standard forms part of the European Performance of Buildings Directive, which was provisionally agreed upon in December.

What are the requirements for a European solar installation?

Equipment deployed in European solar installations must meet stringent standards and certifications to ensure safety, reliability, and performance. Solar panels and associated equipment must carry the CE marking, indicating compliance with EU health, safety, and environmental protection standards.

Will the European Parliament adopt the EU solar standard in 2026?

Jan Osenberg, Senior Policy Advisor at SolarPower Europe, said: "Today, the European Parliament reached a huge milestone to accelerate renewable deployment, by adopting the EU Solar Standard. From 2026, the EU Solar Standard will require solar rooftop installations across a significant proportion of Europe's building stock.
