# East Asia solar container outdoor power is OK

## Overview

---

The Southeast Asian (SEA) region has witnessed a relentless surge in energy demand, driven by rapid urbanization, industrialization, and economic growth. In response, the exploration and development of re.

Will Southeast Asia install a PV system in 2022?

Moreover, it is forecasted that the Southeast Asia region is going to install another 27 GW of PV capacity between 2021 and 2025 . The development and government support toward PV system installation has been summarized the Table 1 below. Fig. 2. ASEAN market cumulative PV system installation in 2022 . Table 1.

Are rooftop solar systems a good idea for the ASEAN region?

Many countries in the ASEAN region have adopted this rooftop solar system idea and the demand is continually increasing thanks to its potential long-term benefit in reducing the electricity cost (Fig. 6). Moreover, rooftop solar systems become a timely and resource-efficient way for the countries to meet it's renewable energy goals.

Are ASEAN countries maximizing solar irradiation opportunities?

Looking at this high level of solar irradiation, ASEAN countries are maximizing the opportunity by installing photovoltaic (PV) systems. The latest market data of PV installation in Year-2020 has shown a total power output of 26.6 GW (1 GW = 109 W) (See Fig. 2).

What are the challenges facing the Southeast Asian PV market?

Despite the promising outlook, the Southeast Asian PV market faces several challenges. The first major obstacle is the insufficient grid capacity to integrate more solar power. Many countries are working to improve their infrastructure to support the increased feed-in of solar-generated electricity.

## East Asia solar container outdoor power is OK
