

# **Egypt New Energy Base Station Work**

## Overview

---

### Why is Egypt deploying battery storage?

Egypt's electricity and renewable energy minister, Mahmoud Esmat, said that deploying battery storage was central to the country's strategy to maximise renewable energy potential. The project is meant to meet peak energy demand and stabilise the grid as more solar and wind power is added.

### What is AMEA power doing with Egypt?

The UAE renewable energy company Amea Power has signed an agreement with the state-run Egyptian Electricity Transmission Company to develop two battery storage facilities with a total capacity of up to 1,500 megawatt-hours (MWh).

### How much money is needed to modernize Egypt's Electricity distribution infrastructure?

Further agreements have been signed to modernize Egypt's electricity distribution infrastructure, including a €60 million investment from the French Development Agency (AFD) for the Alexandria Regional Control Center, with €10 million in grant funding from the European Union (EU).

### How will decommissioning power plants impact Egypt?

The decommissioning of inefficient thermal power plants will lead to annual savings of \$1.2 billion, previously spent on fossil fuels for power generation. Through these ambitious reforms and investments, Egypt is reinforcing its position as a regional leader in clean energy, accelerating its shift toward a low-carbon, sustainable future.
