# Energy Storage Container Earthquake-Resistant Type Purchase Link

## Overview

---

What is energy storage container?

Energy Storage Container is an energy storage battery system, which includes a monitoring system, battery management unit, particular fire protection system, special air conditioner, energy storage converter, and isolation transformer developed for the needs of the mobile energy storage market.

What is a single-unit modular energy storage container?

Compared to traditional 20/40-foot metal energy storage containers, our single-unit modular design offers greater space flexibility, enhances space utilization efficiency, and reduces asset risks during disasters. Our containers come in different specifications, making them suitable for various indoor and outdoor energy storage needs.

What are the components of a power storage box?

One side of the box is equipped with PLC cabinets, battery racks, transformer cabinets, power cabinets, and energy storage power conversion system fixed racks. In addition, the container is equipped with vents. The components they are divided into two rows and arranged on both sides of the container, leaving a passage in the middle.

What is CIMC TLC|RYC energy storage container?

CIMC TLC|RYC Energy Storage Container can integrate energy storage converters and energy management systems according to customer needs. It has the characteristics of simplified infrastructure construction cost, short construction period, high degree of modularization, and easy transportation and installation.
