# Energy company uses 5MWh photovoltaic container

## Overview

---

What is a 5MWh battery energy storage system?

As well as reducing energy consumption; the single 5MWh battery energy storage system makes it easier to select the energy storage converter (PCS) and configure the power station.

What is the difference between Zenergy energy storage container and 5MWh?

Zenergy energy storage container is equipped with self-produced 314Ah batteries, and the 5MWh energy storage container is equipped with self-produced 314Ah batteries. Through modular design, it can be flexibly arranged and expanded, and the system is more standardized.

What is Mercury Max 5MWh liquid cooled container?

Mercury MAX 5MWh liquid-cooled container adopts the 1P104S large PACK solution, which increases the energy density by about 20%, effectively optimizing the production process and saving costs; the compact design and reasonable matching of the power of the hydrothermal system can further improve the energy density of the energy storage system.

What is sly battery 5MWh liquid cooled container energy storage product?

SLY Battery launches 5MWh liquid-cooled container energy storage product. This product is based on 314Ah battery cells, and the energy density per unit area is increased from the traditional 229.3kWh/m<sup>2</sup> to 275.5kWh/m<sup>2</sup>.
