

# Energy storage power supply import

## Overview

---

Are Chinese tariffs affecting battery energy storage systems?

If you're in the business of battery energy storage systems (BESS), you've probably felt the squeeze of tariffs on Chinese imports. For years, China has been a go-to for affordable, high-capacity energy storage solutions, but ongoing trade policies and tariffs have made importing these systems into the U.S. more complicated — and expensive.

Why are battery energy storage systems reopening in the US?

Battery energy storage systems Suppliers of battery energy storage systems (BESS) are beginning to set up shop in U.S., primarily driven by proposed Section 301 tariff increases on Chinese imports, the heavy concentration of battery suppliers overseas, particularly in China, and the manufacturing incentives provided by 45X.

How does tariff risk affect a battery energy storage system (BESS) project?

Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability, as tariff changes can significantly affect cost structures and overall project economics.

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.
