

Energy storage project landing factory

Overview

Where is Moss Landing energy storage facility located?

Moss Landing Energy Storage Facility is co-located on the site of Vistra's existing natural gas-fueled Moss Landing Power Plant in Monterey County - a site that has provided critical electricity to Californians since 1950.

What is Tesla's first energy storage facility outside the US?

First Energy Storage Facility Outside the U.S. The Shanghai Megafactory will mark a pivotal step for Tesla as its first energy storage production site outside of the United States. This venture highlights the company's strategy to extend its influence and capabilities beyond traditional automotive manufacturing.

Will PG&E build a battery storage facility at Moss Landing?

Image: LG Energy Solution. Vistra has previously said Moss Landing Energy Storage Facility could eventually host 1.5GW/6GWh of battery storage, if market conditions make that viable. PG&E also has a BESS plant that it owns, the 182.5MW/730MWh Elkhorn Battery project, at the Moss Landing site.

What is the future of energy storage?

The mass production of these units is expected to start next year with an initial output of 10,000 units annually, equal to around 40 GWh of energy storage. The future of renewable energy relies on large-scale energy storage. The Shanghai Megafactory, Tesla's first energy storage facility outside the US, covers approximately 200,000 square meters.
