Overview

How many battery cabinets can be supplied for an EPS 6000?

Contact your MGE dealer for complete information. Up to a maximum of four battery cabinets can be supplied for a single EPS 6000 UPS module, making additional back-up time available during power outages. An input harmonic current filter is available for the EPS 6000 UPS. For some power levels, the input filter is installed within the UPS enclosure.

What happens if the EPs battery goes down?

The EPS takes power from the battery and is directly connected to it. Therefore, when the battery goes down, it is inevitable for the EPS to stop working. To avoid EPS damage, it is necessary to avoid driving on wet roads. This is due to the fact that the EPS electric engine is linked to the arch and comes into direct contact with the water.

Does the EPs 6000 have an input harmonic current filter?

An input harmonic current filter is available for the EPS 6000 UPS. For some power levels, the input filter is installed within the UPS enclosure. For others, the input filter is installed in an auxiliary cabinet. The EPS 6000 UPS module is normally equipped with circuit breakers rated at 30 kAIC.
