European Union Energy Storage solar Project Installation

Overview

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

What is energy storage Europe Association?

Energy Storage Europe Association is actively shaping the legal and R&D funding framework for energy storage at EU level. Members gain direct influence in the European decision-making process. Members benefit from the Energy Storage Europe Association's expertise and technical know-how, and they can participate in EU-funded research projects.

How does energy storage work in the EU?

The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example on a sunny or windy day - and releasing it when more energy is needed.

Should energy storage be regulated in Europe?

As renewable energy continues to expand in Europe, energy storage must keep pace to ensure the grid remains flexible and stable. The Energy Storage Coalition urges the European Commission to develop an Action Plan on Energy Storage, providing much-needed regulatory clarity and supporting Member States in scaling up energy storage capacity.

European Union Energy Storage solar Project Installation

European Commission publishes new grid rules and plans to ...

1 day ago · The European Union's executive body sets out plan to more closely link the energy systems of EU member states, including commitment to fast-track key interconnector projects. ...

The EU needs an Action Plan on Energy Storage , Energy Storage ...

Oct 15, 2024 · As renewable energy continues to expand in Europe, energy storage must keep pace to ensure the grid remains flexible and stable. The Energy Storage Coalition urges the ...

New report: "EU energy storage action plan needed"

May 26, 2025 · The European Commission must adopt an Energy Storage Action Plan within a broader Flexibility Package, to harmonise markets, remove regulatory barriers, and ensure ...

EU Grids Package to spur investment and ease permitting

1 day ago · The European Commission has also made the long-overdue move to introduce targeted permitting legislation for energy storage. This means that Europe will be able to ...

New report: European battery storage grows 15% in 2024, EU energy

May 7, 2025 · 21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing ...

EU plans 2025 energy storage package

Jun 2, 2025 · The European Commission has announced a European Grid Package, to be launched in the final quarter of the year, which will focus on driving energy storage capacity to ...

EU plans 2025 energy storage package

Jun 2, 2025 · The European Commission has announced a European Grid Package, to be launched in the final quarter of the year, which will focus ...

Energy Storage Europe , The Unified Voice of ...

Members benefit from the Energy Storage Europe Association's expertise and technical know-how, and they can participate in EU-funded research ...

Energy Storage Europe , The Unified Voice of Energy Storage

Members benefit from the Energy Storage Europe Association's expertise and technical know-how, and they can participate in EU-funded research projects. The Energy Storage Europe ...

The role of energy storage towards net-zero emissions in the European

Aug 15, 2025 · This study investigates the role of different energy storage technologies in a European electricity sector that complies with the target of net-zero c...

The EU needs an Action Plan on Energy ...

Oct 15, 2024 · As renewable energy continues to expand in Europe, energy storage must keep pace to ensure the grid remains flexible and stable. ...

Energy storage

Aug 17, 2023 · The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when there is an electricity surplus in the grid - ...

European Solar Charter

Apr 15, 2024 · The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.
