

# **Exchange on Mobile Energy Storage Containers in the Democratic Republic of Congo**

## Overview

---

Is the Democratic Republic of the Congo an energy exporter?

One of the Inga dams, a major source of hydroelectricity in the Democratic Republic of the Congo. The Democratic Republic of the Congo was a net energy exporter in 2008. Most energy was consumed domestically in 2008. According to the IEA statistics the energy export was in 2008 small and less than from the Republic of Congo.

Why is the Democratic Republic of the Congo so important?

Although China has invested capital into multiple mineral-rich nations, the Democratic Republic of the Congo (DRC) stands out because of its vital role in the cobalt market. The DRC produces 80 percent of the world's cobalt—Chinese state-owned enterprises and policy banks control 80 percent of the total output.

Why did China invest in the DRC?

The funds—which would be equally split between mining and infrastructure development—established China as a major investor in the DRC, especially at a time when the DRC's gross domestic product was only \$19.79 billion. At its core, the deal exchanged natural resources for infrastructure spending.

What is happening in the DRC?

The DRC, Africa's second-largest and fourth most populous country, has been devastated by internal conflict for decades, including two wars since the mid-1990s and ongoing rebel violence in the east that required a 24-year-long UN peacekeeping mission, with Chinese participation.
