Financing Plan for a 5MW Mobile Energy Storage Container for Field Research

Overview

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

Why do energy storage projects need project financing?

The rapid growth in the energy storage market is similarly driving demand for project financing. The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects.

Can you finance a solar energy storage project?

Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project. However, there are certain additional considerations in structuring a project finance transaction for an energy storage project.

How can the western area Power Administration support energy storage project financing?

The Western Area Power Administration is a good example of how one of these groups can support energy storage project financing of large projects. Through an infrastructure financing program aimed at expanding and modernizing the electric grid, WAPA's Transmission Infrastructure Program (TIP) can make loans to project.
