How does global container shipping work?

Global container shipping has significantly grown during the past two decades (United Nations). trade volume differences. Traditionally, shipping companies address this by transferring containers between ports using spare ship capacity. However, this does not generate revenue and incurs container management costs (CMCs).

Why do containerships cost a lot of fuel?

Containerships consume much fuel that is sensitive to bunker costs resulting in longer transit times and lower customer satisfaction. Also, shipping carriers are concerned with higher fixed operational costs and a lower freight rate due to ship overcapacity. Therefore, reducing
