

Flat roof solar panels

Overview

How much do flat roof solar panels cost?

Flat roof solar panels can cost between £2,800 - £12,100 for the average 2 to 3 bedroom house. Flat roof solar panels cost less in terms of labour costs since installation is easier (however this depends on your roof). One downside of putting solar panels on a flat roof is that they take up more space per kW.

Can solar panels be installed on a flat roof?

Yes, you can absolutely install solar panels on flat roofs. In fact, flat roof installations often outperform sloped roof systems when properly designed and installed. The key is understanding that panels should never be installed completely flat against the roof surface.

Should solar panels be installed flat or sloped?

In fact, flat roof installations often outperform sloped roof systems when properly designed and installed. The key is understanding that panels should never be installed completely flat against the roof surface. Solar panels require a minimum tilt angle of 10 degrees to function optimally and maintain manufacturer warranties.

Why should you choose a flat roof solar system?

Aesthetically more discreet: Flat roofs allow for solar panels to be hidden from plain view. This can be advantageous to some homeowners who would prefer not to have them visible from the street. Ballasts are easy to adjust: Unlike attaching to a roof or integrating them into the building, PV flat roof mounting systems can be adjusted easily.
