

Gaborone backup uninterruptible power supply recommendation

Overview

What are the different types of uninterruptible power supply (UPS) products?

LEGRAND offers a range of Uninterruptible Power Supply (UPS) products that are divided into 2 different types of products: single-phase and three-phase. The range is wide and complete, with solutions that guarantee maximum performance in terms of power and backup time.

Do you need an uninterruptible power supply (UPS)?

A power failure is more than an inconvenience—it can knock out essential equipment for hours on end. If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

What is a 'uninterruptible power supply' in South Africa?

The Uninterruptible Power Supply (UPS) has quickly become part-and-parcel of life in South Africa. Since the first announcement of 'load shedding' in 2008, UPS systems have been adopted into many households. The devices protect valuable electronics from electrical surge/outage damage and have saved families from countless headaches.

Why should a Home Office have an uninterruptible power supply?

Having an uninterruptible power supply will protect your home office from power surges and more. Some of the most common household appliances should not be plugged into a UPS system. This is because their average draw is very high and can put strain on the UPS potentially damaging it.
