

Generator mounted on cold chain container

Overview

What is a genset generator?

What Is a Genset?

A genset, short for generator set, is a portable power unit that supplies electricity to refrigerated containers (reefers). These containers require a constant power source to maintain internal temperatures within the desired cold or frozen range.

What is a genset on a reefer container?

The Genset, also known as a Clip On Generator, is a handy unit that clips onto the chassis of a Reefer Container to provide power when an external source of power is not available, such as during transport. Our Gensets run on diesel, gasoline or gas. Disc type radial fan for cooling: Sealed large diameter rear bearing.

Why should you choose a container genset?

Portability: Container gensets can be easily attached and removed, allowing for seamless integration into various transport modes. Reliability: Designed for continuous operation, they ensure an uninterrupted power supply for reefers.
