# German photovoltaic energy storage container 200kW

## Overview

---

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a 200kW solar energy system?

**Unmatched Power Generation:** Discover unparalleled energy efficiency with our 200kW all-in-one solar energy system. Designed to revolutionize power generation, this system harnesses the abundant energy of the sun to provide a sustainable and reliable power source for your large-scale projects.

What is a 200kwh air-cooled energy storage system?

Say goodbye to worrying about power outages or fluctuating energy costs - with our state-of-the-art system, you're in control. The 200kWh Air-Cooled Energy Storage System (Model: FC-W-200kWh-100kW) internally integrates DCDC energy storage/photovoltaic-side voltage transformation, supporting connection to photovoltaic systems.

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.
