

# **Greek Carbon Yuan Energy Storage Project**

## Overview

---

What is the Prinos carbon storage project?

They will contribute to the EU's goals of integrating energy markets and decarbonizing the energy system. The Prinos Carbon Storage project, developed by EnEarth, a subsidiary of the UK-based oil and gas company Energean, aims to store up to 3 million tonnes of CO<sub>2</sub> annually by leveraging existing infrastructure.

Will Prinos CO<sub>2</sub> be a green future for Greece?

Prinos CO<sub>2</sub> will allow the north of Greece to play a leading role in the green future of Europe," he concluded. To remind, Prinos is the only producing oil and gas field in Greece. The field was discovered in 1974 and started production in 1981.

What projects are being developed in Greece?

The largest project that Greece is developing is the Prinos CO<sub>2</sub> Storage, which belongs to the Energean company. It is the only project currently being developed in the Eastern Mediterranean and one of three projects being developed overall in the European South, along with that of Ravenna, Italy and the Pyrenees.

What is Prinos CO<sub>2</sub> storage?

The objective of Prinos CO<sub>2</sub> Storage is to contribute to local and regional decarbonization efforts by storing captured CO<sub>2</sub> from hard-to-abate economic activities, Direct Air Capture technologies and BECCS, the shipping industry, and more.
