# Grenada Super Double Layer Capacitor Factory

## Overview

---

What is an electric double-layer capacitor (EDLC)?

It realizes battery-less smart cards equipped with a display, and is suitable for secondary power supplies for wearable devices or IoT devices. The electric double-layer capacitor (EDLC) is made thinner with packaging technology where metal foil laminated film is used, and allowing maximum use of the space for the mountain thickness.

What are TDK supercapacitors?

TDK's large-capacity, thin supercapacitors expand the possibilities of application development.

What is the maximum capacitance of a capacitor?

Products with a maximum capacitance of 500mF and thin products with a thickness of 0.45mm are available in a range from 5 to 15mF. Operating voltage is great at 3.2 to 5.5V, with designs that make them easy to use with circuitry.
