

# Ground-mounted solar panel prices

## Overview

---

As of 2025, the installation cost for ground-mounted solar panels typically ranges from \$1.50 to \$2.50 per watt, depending on factors such as project size, location, site conditions, and the type of mounting system used. How much does a ground mount solar panel cost?

You can now purchase a ground mount solar panel system with installation from Medina EC! The price for a 5kW solar PV system starts at \$17,000. The final price will be determined during your site visit. There is no cost for the initial site visit, but installation charges will vary by location.

Do ground mounted solar panels cost more than roof mounted panels?

Roof mounted solar panels typically cost less than ground mounted solar systems. This is because rooftop installations require less parts and labor compared to ground mounted systems, which require installation crews to start from scratch.

Do ground-mounted solar panels cost more?

Generally, ground-mounted solar panels will cost more to install than an equally sized roof-mounted system. This is partly due to the structure on which the solar panels are installed. A rooftop system is supported by the roof, and the building's structure, meaning erecting a supporting structure is unnecessary.

What is a ground mounted solar panel system?

A ground mounted solar panel system is a system of solar panels that are mounted on the ground rather than on the roof of buildings. Photovoltaic solar panels absorb sunlight as a source of energy to generate electricity. A photovoltaic (PV) module is a packaged, and connected photovoltaic solar cells assembled in an array of various sizes.
