

Has there been any 5G base stations built in Port of Spain

Overview

Will the port of Barcelona have a 5G network?

Other port authorities have done proof of concept and have set up some networks but we understand that, if it comes to fruition, the Port of Barcelona's 5G network will be the first in Spain to be operational and to be able to provide a series of services that we are pursuing.

Will 5G be implemented in Barcelona by 2023?

The idea is that by 2023 we will have this 5G network implemented in at least some areas. Barcelona will host the America's Cup, which will be held in the port, and it is a great challenge for us to ensure that this competition can also benefit from this network.

How many cities will 5G be available in Spain?

The telco said that its 5G FWA deployment will continue to be progressively expanded to another 65 cities in the future. Vodafone also noted that its 5G network will be available in 1,000 municipalities across Spain by the end of the year, reaching 46% of the population.

Does Valenciaport have a 5G network?

With this goal in mind, Valenciaport has embarked on a project to develop and implement its own 5G network ready to work without cables or ties to external operators, with more than 25,000 connected devices (phones, vehicles, surveillance cameras, environmental sensors, security services, drones, etc.).
