Havana Data Center Uses Foldable Container Smart Type

Overview

What is a containerized data center?

A containerized data center, also known as a modular data center, is a data center within a container. For companies that need to increase IT capacity quickly, affordably and temporarily, containerized data centers are a great option, and customized modular data centers can more permanently scale services and support.

What is a smart container?

A smart container is a standard shipping container equipped with IoT technology: Sensors transmit real-time data, for example about the container's location, temperature, humidity, and other key cargo parameters.

Does Delta offer a containerized data center?

Delta offers containerized data centers designed to support edge computing applications and IoT devices. HPE offers a variety of containerization options designed to accelerate container deployment and operations on a global enterprise scale.

Do Containerized data centers work in remote locations?

Containerized data centers work well in remote locations. For example, if a business needs to set up a satellite office, it can roll out a data center in a shipping container to provide remote IT capacity. They're often in use this way for temporary military operations or disaster relief efforts.

Havana Data Center Uses Foldable Container Smart Type

Prefabricated Modular Data Center
Prefabricated modular data centers, also known as integrated modular solutions or containerized data centers, are engineered to meet business-specific requirements to fit in a right-sized ...

Internet of Things (IoT) and Sensor ...
Learn all about the benefits and usage of smart containers, real-time data and IoT technology in the shipping industry and how Hapag-LKloyd is ...
