

WALMER ENERGY

Helsinki power plant energy storage

Overview

What is the future of energy storage in Finland?

Reserve markets are currently driving the demand for energy storage systems. Legislative changes have improved prospects for some energy storages. Mainly battery storage and thermal energy storages have been deployed so far. The share of renewable energy sources is growing rapidly in Finland.

Is energy storage the future of wind power generation in Finland?

Wind power generation is estimated to grow substantially in the future in Finland. Energy storage may provide the flexibility needed in the energy transition. Reserve markets are currently driving the demand for energy storage systems. Legislative changes have improved prospects for some energy storages.

Which energy storage technologies are being commissioned in Finland?

Currently, utility-scale energy storage technologies that have been commissioned in Finland are limited to BESS (lithium-ion batteries) and TES, mainly TTES and Cavern Thermal Energy Storages (CTES) connected to DH systems.

Is the energy system still working in Finland?

However, the energy system is still producing electricity to the national grid and DH to the Lempäälä area, while the BESSs participate in Fingrid's market for balancing the grid. Like the energy storage market, legislation related to energy storage is still developing in Finland.

Helsinki power plant energy storage

A review of the current status of energy storage in Finland ...

Jul 15, 2024 · The share of renewable energy sources is growing rapidly in Finland. The growth has been boosted by wind power during the last decade. Based on the pr...

A review of the current status of energy storage in ...

A review of the current status of energy storage in Finland and future development prospects This is an electronic reprint of the original article. This reprint may differ from the original in ...

Spotlight on Finland: Energy storage sector set to double

Jul 29, 2025 · Finland's energy storage market is expanding, thanks largely to increasing renewable energy sources, plus regulatory adaptation being made by Fingrid, the transmission ...

Technologies for storing electricity in medium

Sep 14, 2023 · This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for ...

One of Finland's largest energy storage facilities ...

May 16, 2025 · The energy storage facility delivered by Merus Power to Lappeenranta, Finland, has been completed and put into market use on 15 May 2025. The energy storage facility is ...

EUROPE and Energy Storage are the key FINLAND

Jun 7, 2024 · Transmission Grids, Capital Cost and Energy Storage are the key action priorities that stand out in Finland's energy horizon, according to the 2024 World Energy Issues Monitor ...

Finland energy storage power station

Currently, utility-scale energy storage technologies that have been commissioned in Finland are limited to BESS (lithium-ion batteries) and TES, mainly TTES and Cavern Thermal Energy ...

Finland to host 90 GWh thermal energy ...

Apr 9, 2024 · Vantaa Energy plans to construct a 90 GWh thermal energy storage facility in underground caverns in Vantaa, near Helsinki. It says it ...

Finland to host 90 GWh thermal energy storage system

Apr 9, 2024 · Vantaa Energy plans to construct a 90 GWh thermal energy storage facility in underground caverns in Vantaa, near Helsinki. It says it will be the world's largest seasonal ...

World's Largest Thermal Energy Storage to be Built in Finland

Apr 9, 2024 · A seasonal thermal energy storage will be built by Vantaa Energy in Vantaa, which is Finland's fourth largest city neighboring the capital of Helsinki. When completed, the ...

Sector Outline Finland: Energy Storage

As the share of decentralised and intermittent renewable energy increases, storage is taking on a central role in enabling its smooth integration into the energy system and in shaving ...
