High power solar glass

Overview

What is photovoltaic smart glass?

Photovoltaic glass, also known as solar glass or transparent solar panels, is a type of smart glass that uses embedded photovoltaic cells to convert sunlight into electricity to generate electricity.

What is Photovoltaic Glass?

Unlike traditional solar panels that absorb visible light, photovoltaic glass converts primarily ultraviolet (UV) and infrared light into electricity, making it suitable for windows, facades and other transparent surfaces of buildings, vehicles and equipment.

What makes Acht a top Photovoltaic Glass manufacturer?

The company is a prominent player in the photovoltaic glass market, offering ultra-clear rolled glass and TCO glass essential for solar energy applications. ACHT's advanced technology, R&D system, and extensive corporate culture have solidified its position as a top photovoltaic glass manufacturer.

What is transparent photovoltaic smart glass?

Transparent photovoltaic smart glass converts ultraviolet and infrared light into electricity while transmitting visible light into the building interior, allowing for a more sustainable and efficient use of natural light.
