# How big an inverter can drive a 3Kw motor

## Overview

---

How much power does a 3 kW inverter draw?

A 3 kW inverter with 85% efficiency would draw 3450 W from the DC battery (ie. 288 A @ 12 V; 144 A @ 24 V) at high load.

How much power does a 5kw inverter use?

Most 5kW inverters consume 50-70W of power when not in use. Victron and Schneider have the most efficient inverters, but this efficiency comes at a price. Some inverters have off switches with remote buttons or have software that detects a load and then switches on.

How much power does a 3kva inverter give?

For instance my Multiplus 3kVA give 2400W, but only 1700W if it is very warm (65 deg). The better the components used, the better the power factor, so don't expect to much from that cheap inverter you buy at that sale. On 2020/09/28 at 9:54 AM, JK844 said: 1. What does your 5kva inverter power?

Can a 3000W inverter run AC?

A 3000W inverter can run all the electric equipment in an off-grid cabin. It's even powerful enough to run a 1HP AC unit together with a refrigerator, TV, electric fan, led lights, and kitchen equipment. Related Reading: DC To AC Conversion: How Do Inverters Convert DC To AC?
