# How many 5G base stations are being built in the United States

## Overview

---

How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

What is the global 5G base station market report?

The global 5G Base Station market report is a comprehensive analysis of the industry, market, and key players. The report has covered the market by demand and supply-side by segments. The global 5G Base Station report also provides trends by market segments, technology, and investment with a competitive landscape.

How many 5G cell sites are there in 2021?

"More wireless infrastructure is a big part of that successful launch as key federal infrastructure siting reforms continue to pay dividends by easing barriers to deployment. By the end of 2021, there were 418,887 operational cell sites across the nation. And that doesn't account for all the new 5G base stations added to existing cell sites.".

Which 5G network is most popular in 2024?

Huawei, Ericsson, Nokia, ZTE, and Samsung are among the world's leading suppliers. In 2024, these five vendors control almost 96.12 % of the global market. China has installed around 12 times as many 5G base stations as the United States. China built more 5G base stations in three months than the United States did in three years.
