

How many 5G base stations are there in Africa

Overview

How many countries are launching 5G services in Africa?

As of September 2023, 27 operators in 16 markets in Africa had launched commercial 5G services. More markets are expected to follow soon, with operators in an additional 10 countries making a commitment to launch 5G in the coming years. 10 countries in Africa have assigned spectrum for 5G services to operators, at the time of writing.

Is 5G making inroads in Africa?

5G continues to make inroads in Africa. As of September 2023, 27 operators in 16 markets across the region had launched commercial 5G services. More markets are expected to follow soon, with operators in an additional 10 countries making.

How many 4G networks are there in Africa?

In Africa, the 700 MHz band has only been deployed in five 4G networks and one 5G network to date, although 14 operators across the region have received spectrum assignments in the band. Accelerating the deployment of 4G and 5G networks requires spectrum in low, mid- and high bands. This is critical to realising the social and economic benefits.

Is there a private 5G market in South Africa?

While the private 5G market in Africa is still in its infancy, there are early signs of progress in South Africa. For example, MTN is building private 5G networks for 14 companies in the mining and ports sectors. In addition to traditional mobile operators, new market entrants are pursuing the 5G private networks opportunity.
