# How many energy storage power supply manufacturers are there in South Sudan

## Overview

---

Does South Sudan have electricity?

South Sudan is one of Eastern Africa's major oil resource holders but exported more than 85% of its production in 2014. Only 1% of the population had access to electricity in the country in 2017.

Is biomass a source of electricity in South Sudan?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. South Sudan: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

What is total energy supply?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country. Some of these energy sources are used directly while most are transformed into fuels or electricity for final consumption.

How does sectoral breakdown affect a country's energy needs?

The sectoral breakdown of a country's energy demand, which is based on its economy, geography and history, can greatly impact its energy needs and which energy sources it relies on to meet those needs – such as fueling automobiles, heating or cooling homes or running factories.

## How many energy storage power supply manufacturers are there in South Sudan?
