

How much does a good solar panel cost

Overview

The average cost of solar panels ranges from \$2.50 to \$3.50 per watt installed, with most homeowners paying between \$15,000 and \$35,000 for a complete system before incentives. How much does a solar system cost?

The solar industry doesn't have a standard pricing structure, so the cost to the customer is based on their energy consumption. The cost of a solar system installation can vary widely when you compare the efficiency rate of the solar panels and other installation expenses. The best solar panels can set you back anywhere from \$15,000 to \$50,000.

How much does a solar battery cost?

They store the energy accumulated from the solar panels. The price varies based on the installer, application and location. Batteries typically cost \$12,000 to \$22,000, according to the Department of Energy, although smaller capacity systems are available for less. In some cases, solar batteries may be more expensive than solar panels.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.

How much does a solar panel installation cost?

Solar panel installation costs vary depending on system size, brand, labor, and additional features like energy storage. On average, solar panels cost between \$2.50 to \$3.50 per watt, with total project costs typically ranging from \$15,000 to \$25,000. Adding features like battery storage can raise costs by another \$5,000 to \$10,000.
