# How much does a grid-connected solar container for an Australian farm cost

## Overview

---

How much does an off-grid solar system cost in Australia?

The cost of your off-grid solar system will vary based on your home though. Expect to pay somewhere between \$25,000 - \$45,000 for an average Aussie home. With the rise in energy prices and climate concerns, many Aussies are turning to solar for their power needs.

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

Are off grid solar systems a good investment?

Off grid solar systems are a promising solution for Australians seeking energy independence and sustainable living. Although the initial cost may present a hurdle, the long-term benefits, including reduced energy bills and environmental impact, make them an attractive investment.

Can a solar premise feed energy into a grid?

Check with your energy distributor that your premise will be able to feed excess energy into the grid. Grid-connected systems have two main components, the solar panel array on the roof, and a grid-interactive inverter, connecting into your switchboard and electricity meter.
