# How much does a portable generator container cost

## Overview

---

How much does a portable generator cost?

A small 7 kW portable generator costs \$10 to \$70 per day to run, while a larger 15 to 20 kW whole-home generator costs \$30 to \$170 per day to run all day. Costs depend on the generator's size, fuel type, and local gasoline, propane, diesel, or natural gas prices. \*Costs depend on current and local fuel prices.

How much does a whole house generator cost?

A whole house generator costs \$3,000 to \$6,000 for the unit or \$6,000 to \$11,000 installed. Portable: One appliance and a few lights. Portable: 10 lights, refrigerator, sump pump, well pump, microwave, TV, laptop, coffee maker, and furnace fan.

How much power does a portable generator use?

Portable generators can be found in a huge range of power ratings. They start with simple 2 to 3kW (2,000 - 3,000 watt) models, usually small enough to carry around and cost the least. These are best used for campsites and powering just one or two things. The larger 5 to 8kW (5,000 - 8,000 watt) units usually come in larger cart models.

How much does it cost to hook up a generator?

However, for high-end gas-powered models, Honda is a leading brand. The average cost of hooking up a portable generator to house connections ranges from \$50 to \$100 when a professional electrician does the work. One of the best things about buying one is that it requires little installation.
