How much does a private 5G network cost?

The cost of deploying a private 5G network for enterprises typically falls between \$250,000 and \$1 million, depending on the size and complexity of the installation. Unlike public networks, private 5G is customized for specific business needs, such as industrial automation, smart factories, and secure corporate communications.

Why should you install a 5G small cell tower?

One of the critical components in this transformation is the installation of small cell towers, which help extend network coverage, boost capacity, and ensure faster, more reliable connections. In this blog, we break down the various aspects of installing a 5G small cell tower and detail the cost factors involved.

How much does 5G infrastructure cost?

The total cost of 5G infrastructure is staggering, with projections estimating that telecom companies will spend over \$2 trillion globally by 2030. This includes investments in spectrum, network densification, fiber backhaul, energy-efficient infrastructure, and emerging technologies such as AI and automation.

How much does a private 5G deployment cost?

Initial costs can be around \$100,000. Backhaul connectivity, which links the core network to the internet, can also be a significant expense, often costing \$30,000 to \$80,000. Understanding these costs is essential for budgeting and planning your private 5G deployment effectively.
