# How much does the Malta energy storage power station cost

## Overview

---

### What is Malta's Energy & Climate Strategy?

This project is in alignment with Malta's energy and climate strategies, as it emphasises the integration of energy emanating from renewable sources and the mitigation of energy curtailment, thus enhancing energy security and reducing carbon emissions.

### What happened to battery energy storage systems in Germany?

Small-scale lithium-ion residential battery systems in the German market suggest that between 2014 and 2020, battery energy storage systems (BESS) prices fell by 71%, to USD 776/kWh.

### How much power will Marsa Power Station have?

The first system (BESS 1), rated at 20MWh (8MW), will be located in the underground tunnels of the former Marsa power station while the second system (BESS 2) shall have a rating 64MWh (32MW) and shall be located within the precincts of the Delimara power station.

### How does the Bess project affect PV generation in Malta?

The BESS project is also intended to mitigate weather-related challenges posed by renewable energy sources, which are reliant on climatic conditions and can therefore lead to significant dips in generation during moments of sudden cloud coverage severely affecting the PV generation in Malta.
