

How much power does a 9KW smart inverter have

Overview

Can a 9kw solar array be put on an inverter?

A 9kW solar array can be put with an inverter with an AC output of 6.75kW. What you "can" do is not what you "should" do. All inverters have different specs. And based on those specs you might be able to put a LOT more panels on than the rated inverter capacity. That does not mean you should.

How big is a 9kw solar power system?

A 9kW system using 370W panels will require about 42.1 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 9kW solar power systems are mostly suitable for higher energy users (3 people or more). This size of solar power system is classed as "Commercial".

Is a 9kw solar array a good size?

While your panel array might be 9kW, the inverter could be either less or more than this size. Normally it is bad to have a much larger inverter than panels. It is usually good to have an inverter that is less than the array size. A 9kW solar array can be put with an inverter with an AC output of 6.75kW.

Do I need a 9kw Solar System?

Whether or not you need a 9kW solar system will depend on many things. If you are a Commercial customer and you use between 34.9kWhs and 54.4kWhs then a 9kW solar system could be a good choice to help reduce power bill costs. Solar Proof Quotes offer a quick and easy way to get 9kW solar system quotes.
