How to add solar panels to solar onsite energy

Overview

How do I add solar panels to my existing system?

If you want to add solar panels to your existing system, the first step is to contact your original installer or another certified PV professional. During your consultation, you can determine which upgrades will be necessary to accommodate the new panels. Is it worth adding more solar panels?

Should you add solar panels to your home?

If you own your system or pay for it with a loan, adding panels to your existing system makes more sense, as it's your system, so you don't have to worry about contracts and lease payments. Depending on the size of your home, you might not even have enough space to add a few more panels.

Can I add more solar panels if my roof is old?

Do not add more solar panels to your system if your roof is old, it is a leased system, or if you do not have enough roof space for extra panels. Contact your original solar installer to add more panels to your system. Why add solar panels to an existing solar system?

Can you add solar panels to a house roof?

Yes, expanding most solar energy systems is possible, but it isn't always cost-effective for various reasons. In some cases, adding solar panels might be more complicated and expensive than it may seem, but it is typically feasible. Adding solar panels to a house roof might involve modifying or adjusting part of the original system setup.
