Asia inaugurated its first BESS-integrated public EV charging station. It has also announced plans to integrate seven more similar projects to boost its EV charging infrastructure. Adding on, China's first BESS Charging Station commenced operations in Ning.

Why should we integrate Bess units with EV charging stations?

Worldwide is expected to rise significantly to meet the climate goals. Integrating BESS units with EV charging stations addresses the challenge of the intermittent nature of renewable energy and enhances the existing and new charging infrastructure. Technology Overview The goal of integrating BESS units is to store energy from the grid and release it to charge electric vehicles when required. When a vehicle is connected to the charger, the BESS unit can provide a stable power source, reducing the risk of power surges.
